PROFESSIONAL SUMMARY

BCA (Artificial Intelligence & Machine Learning) student at Galgotias University with hands-on experience in Python and Java application development. Skilled in building full-stack data applications, automating workflows, and applying core AI/ML and LLM concepts to real-world problems. Seeking an entry-level role in data automation, analytics, or applied AI to support technical and business stakeholders.

TECHNICAL SKILLS

- Programming Languages: Python, Java, C, C++ (object-oriented programming, scripting, application logic)
- Web Development: HTML, CSS, React.js, Node.js/Express (front-end and back-end development for data-driven applications)
- Artificial Intelligence & Machine Learning: Core ML/AI concepts, applied AI coursework, LLM-based tooling
- Data & Automation: Building applications that manage data flow, records, and user workflows; authentication and role-based access (JWT, bcrypt)
- Database: SQL (queries, joins, schema design) - applied in academic projects and coursework
- Data Structures & Algorithms (DSA): Arrays, strings, sorting, searching, and basic algorithmic problem-solving; regular practice on LeetCode and GeeksforGeeks
- Design & Documentation: Adobe Illustrator, Canva
- Tools & Platforms: Git, GitHub, VS Code, Networking Essentials (Cisco NetAcad)

RELEVANT PROJECTS

Requify (Real Estate Web App) | Node.js, Express, JavaScript, HTML, CSS, JWT

- Built a full-stack real-estate web application with role-based access control for User, Owner, and Admin roles, using JWT authentication and bcrypt password hashing
- Designed and implemented a RESTful API (Express) covering authentication, protected routes, property search, owner CRUD for listings, and admin management of users and properties
- Developed role-specific dashboards and a public property search UI with server-side filtering by title, location, category, and description

Plants E-Commerce Platform | Java, React.js, HTML, CSS

- Built an end-to-end e-commerce application handling product listings, shopping cart, and order management
- Owned both front-end (React.js) and back-end (Java) development, delivering full-stack functionality

Online Voting System | Java

- Developed a secure voting application enforcing data integrity and preventing duplicate entries through session and authentication handling

Restaurant Order Management System | C++

- Designed a structured data-tracking and reporting system for orders and billing to support repeatable operational workflows

Portfolio Website | HTML, CSS

- Independently designed and deployed a public-facing personal website end-to-end

Java Calculator | Java, Swing GUI

- Built a GUI-based calculator application focused on usability and reliability of core logic

EDUCATION

Bachelor of Computer Applications (AI & ML) — Galgotias University, Greater Noida | 2023 – 2026 (Expected)

Senior Secondary (Class XII) — Kids Paradise Senior Secondary School | 2023

Secondary (Class X) — Kids Paradise Senior Secondary School | 2021

CERTIFICATIONS

- Networking Essentials - Cisco NetAcad

LEADERSHIP, ACHIEVEMENTS & VOLUNTEERING

- Team Captain, Galgotias University Kabaddi Team - led a competitive team, developing coordination and stakeholder-communication skills
- National-level Kabaddi Player; Gold Medalist, State Kabaddi Championship
- Letter of Appreciation, Boxing Federation of India (World Boxing Championship, Greater Noida)
- Volunteer, Smart India Hackathon (national innovation and technology event)
- Volunteer, World Boxing Championship, Greater Noida

LANGUAGES

- Hindi - Native
- English - Professional Proficiency
